

Trend Dual Hip Brace

DCT-1681 The Dual QUICKFORM Hip Brace provides advanced support and comfort for post-operative hip rehabilitation. Its dual-bar system enhances stability, while the low-profile, moisture-wicking belt includes a pocket for an optional hot/cold pack. With a telescoping hip bar, range-of-motion dial, and unloading hinge, it offers precise, customizable adjustments to promote healing and mobility.

Comfortable Design

The low-profile belt is moisture-wicking and includes a pocket for an optional hot/cold pack, ensuring comfort and convenience..

Highlights

- **Enhanced Stability:** The dual-bar system ensures superior stability and control, making it ideal for post-operative recovery.
- **Adjustable Fit:** Features a telescoping dual hip bar and an unloading/offloading hinge for precise, customizable adjustments tailored to individual needs.

Indications

- Hip labral repair and resection
- Hip arthroscopy
- Hip Capsulotomy
- Femoroacetabular Impingement
- Hip support following surgery or injury

Expertly Designed

Developed with leading industry professionals to deliver advanced, patient-centered support that promotes healing and restores mobility.
